

DP WALL

At Delta Precast, we've developed and licensed our own DP Wall software specifically designed to analyze each structure based on live load, retained depth and water table depth conditions. The program will also continually tell users if the design is adequate through a series of red and green indicator fields. Other features of our DP Wall software include:

- Compatibility on any Windows platform, including Windows 10
- Enhanced interface to provide better user feedback with highlighted text and labeled tabs
- Keyboard shortcuts added for power users
- AASHTO LRFD 7th Edition
- AASHTO standard specifications, and more.

DPAPPS SUITE

\$25 / month

or

\$14.95 / month for 12 months
