

SPECIALTY SPORTS ENGINEERING SERVICES

Delta has been working extensively in the sports-related field for over 10 years and continues to develop this market to deliver an exceptional product with every project we take on. We have provided structural designs at some of the most iconic stadiums in the world for major league baseball teams including the Yankees, Red Sox, and the Washington Nationals. We have also been involved in design work for NFL teams, along with other professional, college, and high school teams.

CORPORATE EXPERIENCE & GEOGRAPHIC REACH

Delta has completed over 15,000 structural design projects at all levels of complexity during the past 25 years. We serve public and private clients across the United States. Our versatility and depth of project experience ranges from the simplest fencing design to structurally complex netting system projects.

COST EFFECTIVE, SINGLE SOURCE SOLUTION

Delta has established a national reputation for delivering cost effective engineering solutions for the sports industry. Our dedicated involvement with industry groups and participation at industry conferences keeps us aware of the latest trends and gives our clients a seat at the table when industry standards are developed. Our in-depth knowledge of the sports industry and of our clients enables us to provide a single source solution for sports products.

STAFF EXPERTISE & RESPONSIVENESS

Delta is well versed in handling the various design and code requirements of each state in which we are licensed to deliver service. We listen to your needs and deliver solutions that solve your design problems and move your projects forward on a schedule that works for you.

OUR COMMITMENT TO YOU

We believe that collaborating with our clients to serve the construction and infrastructure markets by delivering reliable engineering solutions is an important responsibility and one that we don't take lightly. We value your business and treat your priorities as our priorities. What does all of this mean to you - predictability. Delta is here to provide the specialty engineering expertise that support your needs and to deliver your project design cost effectively and on schedule.

EXPERIENCED LEADERSHIP

RICHARD R. SANGUINITO, PE, LEED AP

Mr. Sanguinito is Vice President / Director of MEP Services at Delta. Rick has extensive design and project management expertise in mechanical engineering design, with emphasis on HVAC, plumbing, fire protection and process piping systems. Rick has designed a multitude of steam, chilled water, hot water, heat pump, forced air, plumbing, sprinkler, chemical fire suppression, building control, and specialty systems for new and renovation projects. He has managed a wide variety of private commercial and industrial, governmental, educational, and health care projects and is LEED AP certified. In addition to his high level of competency with all traditional mechanical systems, Rick has designed innovative, geothermal systems that reliably and efficiently heat and cool large facilities.
